Mr. Michael Berkoff  
Remedial Project Manager  
U.S. Environmental Protection Agency – Region V  
Superfund Division, Remedial Response Section #2  
77 West Jackson Boulevard (SR – 6J)  
Chicago, Illinois 60604 - 3590

EPA Region 5 Records Ctr.

365900

Dear Mr. Berkoff:

Re: Pre-Final Design Report Addendum No. 1  
12<sup>th</sup> Street Landfill Operable Unit No.4  
Allied Paper, Inc./Portage Creek/Kalamazoo River Superfund Site  
Allegan and Kalamazoo County

---

Attached please find three copies of the following deliverables for Pre-Final Design Addendum No. 1, as summarized in the Completion of Remedial Design memorandum that was provided to the United States Environmental Protection Agency (U.S. EPA) on April 23, 2009 by Conestoga-Rovers & Associates (CRA) on behalf of Weyerhaeuser Company (Weyerhaeuser) for the 12<sup>th</sup> Street Landfill, Operable Unit No.4, Allied Paper, Inc./Portage Creek/Kalamazoo River Superfund Site, Allegan and Kalamazoo County (Site):

- Revised text of Section 6 of the Pre-Final Design Report (with redline/track changes);
- Design drawings at an approximately 60 percent completion stage (i.e., Drawings C-01, C-02, C-03, C-05, C-06, and C-07); and
- Preliminary design calculations for erosion control.

The revisions to Appendices M and N will be provided to U.S. EPA under a separate deliverable jointly with Plainwell Mill Site deliverable on May 29, 2009 as these documents are being revised to address sampling proposed in the Phase II Remedial Investigation (RI) Work Plan. In addition, the revised Remedial Design (RD) completion and Remedial Action (RA) construction schedules will be submitted to U.S. EPA under a separate transmittal on May 27, 2009 by Weyerhaeuser.

It is noted that CRA has recently conducted surveying activities and has identified several differences between the recent property boundary line locations and the property boundary information from drawings provided by RMT. Therefore the preliminary design calculations for surface water will be provided to U.S. EPA in the next submittal to incorporate the new information rather than this submittal as originally planned.
